EDUCATION

University of Warwick - *MEng Computer Science* Warwickshire, UK | Sep 2025 – Jun 2029

- Predicted Degree: 2:1 (First Year Average: 69%)
- Societies: Warwick Finance Society, Statistics Society, Warwick Hedge Fund Society.

The Henry Box School - *Secondary education* Oxfordshire, UK | Sep 2023 – Aug 2025

- A-Levels: Mathematics (A*), Further Mathematics (A*), Physics (A*), Computer Science (A*).
- Activities: EPQ on machine learning, Student Robotics, GCSE mathematics and music tutor, events pianist.

WORK EXPERIENCE

PwC - *Valuations Intern* London, UK | Aug 2026 – Aug 2026

- Built a DCF valuation model for a €49m, 7-year EUR junior facility, applying 6M EURIBOR zero rates for discounting and calculating 3M forward rates for forecasting; incorporated contractual margin, 0% floor, PIK and prepayment mechanics, and used Goal Seek to derive the implied credit spread at par.
- Valued three GBP-collateralised OIS swaps with a combined notional of £50m and an aggregate valuation of approximately £11m, within 0.5% of the client's valuation.
- Reconciled and validated a lease schedule, tracing and correcting a £300k discrepancy across right-of-use assets, lease liabilities and prepayments caused by a duplicate and omitted lease.
- Performed interest-rate and inflation sensitivity analysis on an infrastructure DCF, assessing their impact on an implied equity valuation exceeding £5bn.

Natural Environment Research Council (NERC) - *Consultancy Intern* Swindon, UK | Aug 2024 – Sep 2024

- Developed an investment assessment framework and automated scoring model to rank 160 net-zero-focused projects competing for a £37m funding pool, weighting projects by carbon benefit, cost efficiency, delivery certainty, innovation and scalability, and presenting findings to directors.

McLaren Racing - *Insight Week* Woking, UK | Jul 2024 – Aug 2024

- Analysed 500m+ wind-tunnel pressure-sensor data points to identify opportunities for aerodynamic optimisation.
- Reconfigured the 60%-scale 2025 model's suspension assembly and brake-drum shrouds for wind-tunnel testing.

PROJECTS

Automated Equity Valuation Model Jun 2026 – Aug 2026

- Built an Excel valuation tool that, using python and VBA, fetches financial statements and comparables from LSEG or alternative APIs based on an input ticker, and populates the model automatically.
- Implemented a 10-year DCF and reverse DCF (perpetuity and exit-multiple), comparable company analysis and an in-progress precedent-transactions module, with configurable WACC and growth assumptions, and sensitivity tables feeding into an automated football field chart of implied equity values.

UK UMushroom Investment Competition Oct 2025 – Dec 2025

- Placed top 10 at Warwick University, identifying investments and managing a £100k simulated multi-asset portfolio.
- Developed and articulated an investment thesis and asset-allocation strategy across equities, commodities and funds, pitching to industry judges and receiving positive feedback on analysis and communication.

UK & Europe M&A Case Competition – Shell / Kosmos Energy Feb 2026 – Mar 2026

- Co-led a two-person team building an M&A model for Shell's potential acquisition of Kosmos Energy, including WACC, 5-year DCF with sensitivities, comparable companies, sources & uses and pro forma accretion analysis.
- Developed a pitch deck recommending the acquisition strategy, covering strategic rationale, transaction overview, market context, valuation, synergy case, pro forma impact and key risks with mitigations.

ADDITIONAL INFORMATION

Skills: Excel, PowerPoint, Python, SQL, Java, Haskell
Virtual Simulations: JPMorgan Investment Banking (Forage), IEUK 2026 Finance, AmplifyMe Finance Accelerator
Interests: Coffee, jazz, piano, cornet, guitar, tennis, watchmaking
